USART : Perangkat yang digunakan untuk menerjemahkan data pada komunikasi standar RS232.

DAFTAR SINGKATAN

DAC : *Digital to Analog Converter*

Daqboard : *Data Acquisition Board*

DC : *Direct Current*

GUI : G*raphical user interface*

HMI : *Human Machine Interface*

IC : *Integrated Circuit*

IP : *Internet Protocol*

I/0 : *Input/Otput*

LAN : *Local Area Network*

Labview : *Laboratory Virtual Instrument Engineering Workbench*

Op-Amp : *Operation Amplifier*

PC : *Personal Computer*

PCI : *Peripheral Component Interconnect*

PID : *Proposional Integral Derivative*

SA : *Servo amplifier*

SCADA : *Supervisory Control and Data Acquisition*

TCP : *Transmission Control Protocol*

TTL : *Transistor Transistor Logic*

USART : *Universal Synchronous Asynchronous Serial Receiver and Transmitter*
