LIST OF TABLES

2.1 Comparison on experimental result of car detection 6

4.1 List of video sources for the data collection 33
4.2 The cases of experimental features 39
4.3 List of all parameters used for motorcycle detection 41
4.4 Performance accuracy of machine learning on our proposed features. 42
4.5 Performance comparison of the ground truth classification 43
4.6 Result of motorcycle detection by various classifiers on the proposals 45
4.7 Performance comparison of our classification design with VGG net. 45
4.8 Experimental result of the combinational equations. 54

A.1 Training time of machine learning on our proposed features. 63
A.2 Testing time of machine learning on our proposed features. 64
