

## ABSTRACT

Badan Perpustakaan, Arsip dan Pengembangan Sistem Informasi (BAPAPSI) is one of the Satuan Kerja Perangkat Daerah (SKPD) under the Government of Bandung Regency. BAPAPSI has a fundamental duty to carry out the preparation and implementation of regional policies that are specific in the field of library management and service, archival, and information system development. Instruction of president of the republik Indonesia number 3 of 2003 on national policy and strategy development of the e-Government becomes a new challenge to government agencies.

Therefore, it is necessary to design the enterprise as a whole to align business strategy and information system strategy at the enterprise that is enterprise architecture. TOGAF ADM is a framework that can be used to aid the design of enterprise architecture in BAPAPSI especially library sector. The phase that are done in designing enterprise architecture for BAPAPSI especially library sector include preliminary phase, architecture vision, business architecture, information system architecture, technology architecture.

The result of this research are business architecture blueprint, information system blueprint, and technology architecture blueprint in library sector. The result of this research can be used in designing IT master plan for Bandung regeny government.
