

## ABSTRACT

Klinik Pratama Rawat Inap Pelayanan Medik Dasar ( KPRIPMD ) Muhammadiyah Kanigoro is a form of Muhammadiyah charity in the field of health, is called the Pembina Kesehatan Umat. Finally, based on the Law of the Republic of Indonesia Number 44 Year 2009 on the Hospital's mission and vision, clinic Muhammadiyah Kanigoro increase the range of clinic into hospital based on the expiration of the license KPRIPMD Muhammadiyah Kanigoro based on the Ministry of Health No. 666/ Menkes/ SK/ VI/ 2007 About the clinic Inpatient Primary Medical Services from 2011 to 2016.

According PERMENKES Decree No. 986/ Menkes/ Per/ 11/1992 Services Government General Hospital Department of Health and Local Government classifies hospitals class/ type C for Clinical Muhammadiyah Kanigoro.

Substitution of the clinic into a hospital would require additional changes and needs of the facility. Problem in the clinic are to program the space in the fulfillment facility to qualify as a hospital. Muhammadiyah Kanigoro clinic has a limited circulation space, the space program that has not been good, and healing environment conditions have not been up for a hospital. When linked to the psychology of color, colors application in a hospital room can be used as a therapy or healing support.

Design of Muhammadiyah Hospital Kanigoro is healing environment is the health of patients by maximizing color and circulation space that can supports it. Color is giving most dominant effect on the psychology of visitors to heal, that's why the color is applied in this hospital on a space that corresponding with ongoing activities in it.

Color application in the design is color pigment, color lighting and furniture. Color lighting using hidden or accent lamp on the wall and furniture and wall using pigment color to give the impression of a comfortable and homey (not rigid), dramatic effect and can be adjusted according to the desired color mood of patients to be able to rest in peace.

So, in the design of the Muhammadiyah Hospital focus to the healing environment in order to improve patient condition to get well soon. Not only in terms of medical healing, but also healing of the non-medical side that is affected by healing environment devoted to certain colors will also have a positive influence on psychology and health of the patient.
