

Abstract

Technology is so important in Education Development. Mostly institutions apply Technology in Education intervention, especially institution-based Technology as ITENAS. Institute Technology of National is an Institute focusing on developing Technology for National Development and has planned to be number one in Technology field and art. ITENAS is developing to continuously of facilities activities have great influence over to achieve vision. One facility is the library center because the library of ITENAS has not the criteria number one in Technology and art. Level of liveliness student in using the facilities library is still low from similar institutions library. The librarian planned to change the image of library which only serves as a means of just supporting learning, but to be a space as a knowledge Development especially in Technology field and art, and apply design with more innovation. So the library can achieve the goals for ITENAS vision. The library Center in the future hopefully can be a Great space to support all Activities of students and be able to give more inspiration to users, so that can create an idea and more innovate in Technology field and art.
