

ABSTRACT

Mosque is one of the worship place for muslims which has big capacity that can accommodate for more than a hundred people. But in any occasion ,The mosque also have another function not only as the worship place but also as the place that can be full with religious activity. For example is Masjid Syamsul Ulum one of the University Mosque that located in Telkom University area. Over the time, Masjid Syamsul Ulum can't accommodate enough room facilities for user because the increasing of student body from displacement 4 different Institutional which became Telkom University. The increasing of user always happened especially in the peak season like friday worship and muslim's holy day. Besides primary activity such as pray and *tadaru*, Masjid Syamsul Ulum also used for *Madrasah Quran*, *Mentoring* activity, *tabligh akbar* and living house for the guest and the employee of Masjid Syamsul Ulum. So that, Masjid Syamsul Ulum need another facilities to accommodate a lot of activity by build an Islamic Centre of Masjid Syamsul. Islamic Center of Masjid Syamsul Ulum will be focused on the open plan concept which the ambiance and environment can merge easily not only with the collegeous but also with the citizen around Telkom University by applying 4 aspects such as spiritual facility development, social facility development, educational facility development and financial facility development.
