ABSTRACT

PT. Perdana IMMG as a media marketing group in Indonesia, nawadays, is facing a tight competition with othe media marketing companies. This competition demands PT. Perdana IMMG to have qualified Human Resources (HR). This circumstances make PT. Perdana IMMG has to monitor its HR performance peridiocally. Recently, HR performance appraisal has been done, but this appraisal focused on individual performance appraisal. PT. Perdana IMMG needs a systematic strategic HR management instrument as well as a toolkit to measure HR performance, to determine how HR contribute in organisational performance, and as a based for decision making in HR. Based on this empirical issues mentioned above, this research is intended to identify variables of measurement that represent and measuring the HR performance of PT. Perdana IMMG, using HR Scorecard.

One of method of contemporary measurement is HR Scorecard which is a measurement system that linking people, strategy, dan performance, through four perspective, which are financial, customer, internal buiness process, and learn and growth. Measurement of company performance conducted after the arrangement of its measurement system id finished. Improvement process through some stage, which are: interview, identify and weighting of measurement indicator, as well as designing it information system as a toolkit.

The performance measurement system planning produces 18 strategic measurement variables having certain effects to HR performance of the business firm. The biggest strategic measurement weight for each perspective will known as Key Performance Indicator. Those key performance indicator for each perspective are:

Perspective	Perspective Weight	Key Performance Indicator	Measurement Weight
Financial	25,58%	Human Capital Value Added	59,61%
Customer	52,00%	Employee Satisfaction Index	52,61%
Business Internal	15,18%	People Mangement Score	52,34%
Process			
Learn and growth	7,24%	Sum of Training and Developmet a year	33,92%

Overall HR Performance measurement is accomplished using information system designed. Results of performance measurement of each perspective are as follows:

- 1, Financial perspective has performance grade as 3,28 (Poor)
- 2. Customer perspective has performance grade as 3,53 (Poor)
- 3. Internal Business Process has performance grade as 3,22 (Poor)
