ABSTRACK

New development and innovation in a discovery is needed, especially on attendance monitoring and report cards used by teachers and students in schools, currently attendance system and digital report cards are still scattered and errors in value writing on the report card, in addition to the students more easily absent in school. So in this final project will be built a digital report card and monitoring web-based persence system. Where will be added functions and security files. This application can notify students who are lost to the system by broadcasting via telegram to parents' mobile phone so that the parents can know the status of the child's presence. Created a digital report card to memorize the loss of report cards, incorrect value writing on the report card. Make report cards unpleasant because there are streaks and signatures. In addition, it can be printed repeatedly and parents of students who are busy with work so do not have time to take the report card.
