ABSTRACT

Student Activity Center is one of supporting facility to embody the student and non-academic civita's activity. To shape learners to be a part of the society, which expected will not only ha ve academic and professional capabilities, but also can applying and developing science, tech nology, and arts. That's why its facility is needed. The example is Campus Center ITB, its bui lding is in the ITB campus area, architectured by Baskoro Tedjo. The main function of the bu ilding as a secertariat of student activity units and non-academic services office. However, th ere are problems such as the facilities are less effective, also standards and aesthetic building that not reflected as a student activity center. To maximize it, redesign interior of Campus Ce nter ITB wants to be done, concerned to student as the main character. Through the applicatio n of the selective furnitures, colors, and materials. It's expected can support the student activity center r building.
