

ABSTRACT

KONI is an abbreviation of the National Committee of Indonesian Bodybuilding. KONI office in western Java province is located in the city of Bandung which has a target to make KONI as an independent organization and professional, to build national sports achievements, in order to raise the dignity and dignity of the Indonesian nation. KONI offices that now have some design problems, such as KONI functions and facilities have not been properly processed and not in accordance with the needs of space users, the second problem is the existing KONI office layout has not meet office standards, the third problem is that the applied theme does not reflect the character Or the purpose of KONI, as for other problems is the circulation, lighting and penghawaan not optimal. To overcome the above design problems the way is the first to design office facilities and infrastructure in accordance with the needs of users / workers, the second designing the office KONI layout that meets office standards, the third design theme that reflects the character or purpose of KONI office and for the next problem way To overcome it is to make circulation, lighting and pengawaan to the maximum standards. The theme that will be applied to redesign the KONI office is Supportive & Sporty office. The purpose of implementing the supportive theme is to answer the problem of poorly functioning space and also the amount of space that is less functional or not functioning properly, while the sport is intended for the color of the room and shape in accordance with the sports atmosphere that should look at the building or office KONI. From the above themes it can be determined the concept, the first concept of color, the colors to be used are the colors that can provide motivation or spirit of work and also the spirit of exercise, namely white, red, blue, yellow and black. The second is the concept of the form or layout of the office, which will be used is a closed office space or room because each division has a different task. The next is the concept of circulation, circulation patterns that will be used is a pattern of circulation linear with circulation connecting through space.

Keywords: spatial processing; Use of color; circulation.
