

## LIST OF TABLES

2.1	Type of Substrate Materials. . . . .	9
3.1	The Specification for initial antenna design. . . . .	17
3.2	Targeted parameters of this thesis. . . . .	17
3.3	The results of 6 GHz patches from calculations using the specifications from Table 3.1. . . . .	18
3.4	The results of 6 GHz Feed Line from calculations using the specifications from Table 3.1. . . . .	19
3.5	The results of 5 GHz patches from calculations using the specifications from Table 3.1. . . . .	20
3.6	The results of 5 GHz Feed Line from calculations using the specifications from Table 3.1. . . . .	21
3.7	The Specification for Main Feed Line. . . . .	23
3.8	The Specification for Ground Plane and Substrate. . . . .	24
3.9	The Specification for Antenna Initial Design. . . . .	25
3.10	The Change in Specification for Antenna Iteration 1. . . . .	27
3.11	The Changes in Specification for Antenna Iteration 2. . . . .	29
3.12	The Changes in Specification for the Final Antenna Iteration. . . . .	30
4.1	The VSWR Analysis. . . . .	33
4.2	Farfield Directivity properties of 5 GHz Azimuth radiation pattern .	37
4.3	Farfield Directivity properties of 5 GHz Elevation radiation pattern .	38
4.4	Farfield Directivity properties of 6 GHz Azimuth radiation pattern .	39
4.5	Farfield Directivity properties of 6 GHz Elevation radiation pattern .	40
