

ABSTRACT

Monitoring is the process of collecting and analyzing information in accordance with established procedures regarding program activities or school activities so that corrective actions can be taken to improve further school programs or activities. Until now, the *monitoring* process carried out by SMAN 1 Dayeuhkolot is still done manually, starting from collecting honorary employees, conducting attendance attendance, calculating salaries to submitting everything manually. In overcoming these problems, we need a *monitoring* application that can make it easier for SMAN 1 Dayeuhkolot in *monitoring* honorary employees. The programming language used is PHP with the Codeigniter framework. With this application, it can make it easier for *users* to monitor honorary employees at SMAN 1 Dayeuhkolot.

Keywords: *Monitoring*, SMAN 1 Dayeuhkolot, PHP, Codeigniter
