

ABSTRACT

Catering vendors, namely food service providers in large quantities or so-called catering. Catering Marketplace Application Catering Partner Module is an application used by catering service providers in the KETRINGAN system that can manage availability in providing food, managing food menus, financial reports, managing deposits, and managing the personal data of catering service providers. With the Web Catering Marketplace Vendor Module application, vendors can support vendors in managing their accounts. KETRINGAN's products and services have received positive responses from consumers and vendors, such as vendors who have a good impact on running their business and can compete with catering service providers who have large capital and consumers who are helped in finding food vendors.

Keywords: Deposit, Vendor, Food Menu, Orders.
