

ABTRACT

Web applications was very innovative and variuos. All innovative project can be online. Dispite this, web interaction design can't help but feel a little envious of desktop software technologies. Desktop application have a richness and responsiveness that has seemed out of rich of the web.

Now, we find a new approach to web applications that at Adaptive Path have been calling Ajax. The name is shorthand for Asynchronous JavaScript + XML, and it represents a fundamental shift in what's possible on the Web.

To develop the application with AJAX, we use PHP 4.3.6 as programming languages software and MYSQL 4.0.24 as the database management system software, and Apache 2.0 as the web server.

Keywords : AJAX, Javascript, XML.
