

ABSTRACT

Cafe Terasosis is a cafe located in East Jakarta. This cafe is one cafe that provides a variety of foods made from sausage. In conducting its business, service Cafe Terasosis are still using paper-based systems. It is difficult for employees serving customer in the cafe, especially at rush hour. At that time the confused waiter to serve the customer who come to order and also spend a lot of paper because it still uses paper to take orders. Coupled with the payment system is still manual which causes the calculation is quite time consuming. It is necessary to build a system that can assist in the calculation and take orders. Applications made ordering and payment transactions web-based food and beverages at Cafe Terasosis. Applications built using the programming language PHP with a MySQL database. This application has a feature for menu ordering to customers digitally, calculates the bill payment, helps managers see the cafe in the financial statements.
