

ABSTRAK

Mandiri Bank Imam Bonjol Branch is part of the bank restructuring program implemented by the Indonesian government in the city of Medan, North Sumatra. One of the services of the Mandiri Bank Imam Bonjol branch is giro and checks transactions. Giro is a banking term for a method of payment in the form of a warrant to transfer some money from one's account to another account designated the letter. Check is one of the means used to draw or take money in the checking account. Recapitulation process documents giro transactions and checks carried out using manual documentation (handwritten) by the back-office employees. Storage of data summary reports are also still in the form of bookkeeping. If the summary data using Computer Base Information System (CBIS), then the time required to manage data and report reports can be done more quickly. This recording application created using CodeIgniter Framework and MySQL databases.
