

ABSTRACT

The use of computerized system will facilitate the process of business in T-Mart mini market. When this system is not exist it probably will make the process of business take a long time. It can be seen from the every day's transaction processing, it needs a kind of system in which can make the business easier and quicker. The system of sales by voucher and the sales of mineral water by voucher make the transaction processing more complex. Since there are Sales application, Purchase application, and cash flow application hopefully will make an easiness to the process of making financial statement and will give accurate information for the company.
