

ABSTRACT

Indonesia is a country which is rich in fairy tales, one of them is fable. Fable should be introduced to children from entering school age because fable is delivering the value of life, as found in fable “The Too Confident Mouse Deer”. In this scheme the author uses the case study method to understand personality intrinsic the mouse deer. Based on the study results obtained by the authors conclude that the main character of the mouse deer itself has a value of personality traits. The personality traits hare itself can be shown to children through the design of 3D character animation the mouse deer characters facial expressions to convey the value of personality in the character of the mouse deer so that could be a model of social value for children in behave in everyday life.
