

ABSTRACT

CV Callisto is a company engaged in the sale of stationery (ATK) in Bandung and was founded in 2009. In CV Calisto system or process is still manual which is that process recorded in the books. This process starts from recording sales transactions, recording the purchase of stationery and manufacturing sales report daily or monthly which is made by several stages books.

To solve these problems, this project built a web-based application of cash sales. Preparation of design analysis was conducted using a structured information system with the Systems Development Life Cycle (SDLC) models waterfall and implemented with the programming language PHP and MySQL database. This application can simplify CV Calisto manage cash sales, featuring journals, ledgers, and the list of purchases ATK. This application has four user that is part of the sale transaction managing cash sales, purchasing department manages the recording of purchases, the manager verifies the purchase and owners can view and monitor the sales transactions that occurred in CV Calisto.
