Abstract

Kencolepot is a mobile application that designed and made to help the tourists, people of Bandung, or the student whose study in Bandung and if they want to look forward for culinary tour that fit with their cash. Kencolepot Apps has speech to text feature that can allow user if they want to look forward some place with their voice, Kencolepot will search that place and show the list of it.

Kencolepot also have direction feature that will help the user to show the direction from the user current position until the place that user want to visit. The use of attractive graphics and also the familiar icons that help user much easier, would make Kencolepot Apps as a user friendly apps for teenagers and adults.

This Application could be installed on smartphone that used Android OS, and for this implementation of application the developer using JAVA with Android platform. This application still need further development, expected future for data culinary tour even more.

Keywords: Kencolepot, Bandung Culinary Tour, *Speech to Text*.
