

ABSTRACT

Offices development of this modern world are very advanced. Office developments can be seen from originally just a place to work which is identical to the formal rules that have evolved into more flexible and more relaxing situation without leaving the office rules as place to work. PT. Dirgantara Indonesia is one of the office's icon that represents Indonesia, with specialization in the production and aircraft services and focusing on the aircraft production which is engaged in global market. PT. Dirgantara Indonesia directly represent Indonesia as one of the leading company which can bring Indonesia internationally. By focusing Design Centre as a representative division of PT. Dirgantara Indonesia, this division has become division who directly deal with clients and became division that introduced PT Dirgantara Indonesia's products. The design of interior design division Design Centre is expected to give impressions of representative or impressions that represents the company, and make PT. Dirgantara Indonesia able to compete international market. The theme and the concept in this design is "airplane", because the company is engaged in the aircraft production, and with futuristic concept which explains that this design will be more towards to the future with the use of technologies. To make more highlighted this design, the lobby as representative space in this office and back to the original issue, work station is a key element in an office, division's head as a representative of the space agency officials in this office, as well as meeting the room as supporting element in an office.
