

## ABSTRACT

*The ornament adding into a product generally to make more beautiful, so that product more interesting, both estetic and more value. Java ornament has very variatif pattern. Generally Java ornaments are stilation form or simplification form from vegetation. Java ornament known with carving pattern, one of Java carving pattern is Majapahit pattern.*

*Majapahit pattern has interesting pattern, but the aplication of majapahit pattern still limited to the woods media. Majapahit pattern has potency to developed again the pattern into more contemporary pattern. In this research Majapahit pattern will collaborated with Paisley pattern to be more inovative pattern. The use of print digital technique is technique to printed those pattern into fabric. Moreover embroidery, cutting, and layering technique are technique that give the texture effect on fabric (embroidery) and give the transparant effect on fabric (cutting and layering), with the purpose that pattern can be seen with the differnt effect and more interesting.*

*The combination from Majapahit and Paisley pattern created new pattern which is more simple and contemporer. Majapahit pattern has stiff character packaged become new pattern which is more dinamic with the Paisley pattern inside. Print digital technique help the process fabric printed faster and cheeper. Embroidery technique with gold yarn help gives texture effect and sense of luxury into fabric. Fabric sheets from this exploration combination pattern aplicated to fashion product that are formal moeslem fashion, bag, and craft with the simple pieces but elegant.*
