Tourism is a industry is very important, because with the advancement of the tourism sector will stimulate the economy of the surrounding community. As Banyuwangi which has a lot of potential for tourism development, but a lot of other attractions in Banyuwangi who did not develop into a leading tourist attraction in East Java. It is necessary an information media to inform travelers about the attractions that exist in the District Bayuwagi.

This design can be realized with the data through literature and the results of the field by means of observation, interviews and questionnaires. From the results of the above research data will be used as a basis for designing a travel guide book as a medium of information.

Results of the design in the form of guide books will contain a description of sights with penajian practical to carry and use the panoramic shooting technique. This handbook will also show the composition of shots aimed at giving lessons to the reader to get the best picture quality.

Keywords: Banyuwangi, Books, Photography, Panorama
