

ABSTRACT

Yayasan Kesehatan Telkom (Yakes Telkom) is an auxiliary unit that handles health issues retirees, employees and their families at the PT. Telekomunikasi Indonesia Tbk. To carry out business activity, Yakes need the adequate information system. Moreover, with the government policy related to the Social Security Agency (BPJS) will be a challenge in the Yakes due to the need alignment of business processes, and information technology to support the business strategy BPJS on Yakes Telkom.

The method can be used for the alignment of business strategy and information technology can use the Enterprise Arcitecture. TOGAF ADM can be one of the framework as a guide in making the enterprise architecture. This study will produce a blueprint, especially in information systems architecture that helps in making enterprise architecture and is used as a reference for the development of information systems planning Yayasan Kesehatan Telkom itself, or linked to cooperation with BPJS.

Keyword: Enterprise architecture, blueprint, information system, TOGAF ADM, Yayasan Kesehatan Telkom (Yakes Telkom), BPJS.
