

ABSTRACT

PD. Odes Multiservice is a company distributor on the sale of beverage distribution. In promotion products, PD. Odes Multiservice still procure, so the information to customers not optimal. System on the sale of beverage is still simple, on via telephone or come to the store for order and buy the products.

Based on that problem, in this final project created a information system on the sale of beverage distributors *website* based on PD. Odes Multiservice, in order to facilitate the sale and marketing of product owned. All enterprise data is stored in one integrated *database* can be accessed anytime via *internet*. So Companies can see the sales and financial report by *online*. This *website* has several features, include complain message facilities or inbox.

Result of this Final Project is dynamic web and have attractive appearance, so company promotion and marketing can be optimally. Integrated *database* system and authentication system for *users* make a web safety for access. This web facilitate transaction between company and customers with several features on the web. This application can boost marketing area of products PD. Odes for Bandung city area
