

ABSTRACT

STUDY ON DECISION MAKING ON NATIONAL DELIBERATION ACTIVITY OF IDCC YEAR 2015 USING SMART METHOD

National Deliberation Activity of IDCC year 2015 was a very important activity and become the main priority because the results of decision-making will affect the community for a whole year. Since IDCC implementing the management system, decision-making is only done by the managers and there is a phenomenon that the members outside the management system tend to only accept the results of the decisions that has been made without knowing how is the process and which indicators that used. That phenomenon is causing the application of the results of decision-making does not run accordance with the expectation and there are complaints from the members.

Through this research, it will be done the mapping and evaluation of the results of the decision-making process which conducted in the National Deliberation Activity of IDCC year 2015 by using one of many methods for decision-making with many criteria that is SMART (Simple Multi Attribute Rating Technique).

Data collection is done through two ways, first through interviews with two main speakers determined using a purposive sampling technique to obtain qualitative data, then the data will be used as the basis of quantitative data collection by spreading questionnaires to 63 respondents which are all the members of IDCC determined using saturated sample technique. Data from the questionnaires will be analyzed using SMART method.

Based on the results analysis of the four decisions result on National Deliberation Activity of IDCC year 2015 there is one decision result that has not in accordance with calculation namely the decision to choose the District Leader of BSD. That can be caused by disuse a method of calculation and not involving all the members while doing decision-making.

This research suggested IDCC to make changes on how the decision-making process be done to avoid any errors. The changes that can be done is applying a calculation method to assess criterias and alternatives of decision-making, the stewards providing information about the reasons and considerations used in a decision-making and also involving members when assess alternatives of a decision.
