

ABSTRACT

PT. Kieraha Media Television is a cable TV Company engaged at North Maluku, management and payment of the registration activities from installer and still done manually which is still book keeping records. Seeing these problem arise the idea to build a web-based sistem in which able to manage activities of registration, installation, payment and provide broadcast to all customer via sms in case of description of payment due. The methodology used in the making of this application is the Waterfall method. The programming language used is PHP 5.5 with CodeIgniter framework and HTML 5. The database used is MySQL as well as the editor used is XAMPP and Notepad ++. This application is used by 4 users is customer, administrative Officer, filder and Owner. From the resulting system design registration systems and we -based payments that can help all users in performing each activity more easily.
