

ABSTRACT

Indonesian Red Cross (PMI) is a Social Humanitarian Institute neutral and independent, established with the aim of helping alleviate the suffering of fellow human beings regardless of their background nationality, ethnicity, religion and ideology of those who helped. Many activities undertaken PMI relating to social ministry. Some are referred to social services, among others, Blood, Restoring Family Links (RFL), the Disaster Emergency Response Assessment undertaken by Red Cross volunteers are on the Voluntary Corps (KSR), Voluntary (TSR) and Community Based Disaster Preparedness Team (Sibat) , RFL is the restoration of family relationships during conflicts or in the event of a disaster. Assessment is an assessment of the disaster. Sibat is a member of the public who declare themselves as Red Cross volunteers and are willing to devote time, energy, and their minds. They motivate and mobilize society in the environment to be able to make efforts in preparedness and emergency response in villages / wards Community Based Disaster Preparedness Program (KBBM). Most of the activities of the community social services have not been able to properly socialized to the community. Information Services Information System for Community-Based Social was created using the PHP programming language and framework Code Igniter.
