

## ABSTRACT

---

*Iqra' is learning method to read Hijjaiyah. This method is a basic training to read Al-Qur'an without melodic ryhtm. This method focus on the rule to read Al-Qur'an such as tajwid and makhroj for each letter. Makhroj is the pronunciation for hijjaiyah letter. Learning Iqra' can be implemented in mobile technology. The implementation can make people learn it without feels bored because of the interaction that can be made using this technology. Android Based Application to Learn Iqra' can give new experience in learning iqra', because it has functionalities such as hearing pronunciation and giving bookmark as the history and tracking of learning process. Aplication made by using ADDIE method consisting of Analisis, Design, Development, Implementation and Evaluation. Application made by Microsoft OS Windows 8.1 64- Bit, Adobe Photoshop CS 6, Android Studio and SQLite.*

*Keywords: Iqra', Android, Adobe Photoshop CS 6, Android Studio, SQLite.*
