

## **ABSTRACT**

*Stock is investor's most attractive financial instrument as medium to invest. Before investing, they need to know the information about changes in stock prices are influenced by several factors.. There are internal factors and external factors served as the basis of knowledge of financial performance. Internal factors' analysis include financial ratios, while external factors include macroeconomic variables.*

*This study aims to determine the influence of internal and external factors on stock prices. Variables independence of this research are Current Ratio, Debt to Equity Ratio, Return On Equity, Earning Per Share, Inflation, Interest Rate. Meanwhile variable dependence is stock price.*

*Secondary data used in this research are company's financial report. The object of this research is a mining compaies listed on the Indonesia Stock Exchange period 2010 – 2014. Sampling was done by purposive sampling technique and result in 30 companies. The analytical method used in this research is the analysis of panel data.*

*Result shows that Current Ratio, Debt to Equity Ratio, Return On Equity, Earning Per Share, Inflation, and Interest Rate simultaneously significant influence to mining companies' stock price. Current Ratio, Debt to Equity Ratio, Return On Equity, and Interest Rate partially significant influence to mining companies' stock price. Even though Earning Per Share and Inflation partially not significant influence to mining companies' stock price.*

*Based on results, internal factor suuch as Currrent Ratio, Debt to Equity Ratio, and Return On Equity, while external factor such as Interest Rate may be used as a reference stock price assessment both by management to manage company and investors determine the invesment strategy in order to obtain profit.*

**Keywords:** *Companies' Internal Factors, Companies' External Factors, Stock Price*
