Abstract

A good government or ideal to be supported by good governance of information technology as well. Government in Central Sulawesi has been implementing information systems / information technology (IS / IT) at each of its business processes, but there are no strategic planning process for IS / IT. By using the IS / IT as strategic planning is expected to increase the profits of an organization. The method used in the IS / IT as a planning strategy for governance in Central Sulawesi are using The Open Group Architecture Framework (TOGAF) Architecture Development Method (ADM). TOGAF ADM contains steps that could make the design of Enterprise Architecture (EA) for an organization before the organization into the implementation of IS / IT. The output produced from phase TOGAF ADM will generate Enterprise Architecture (EA) which may be used as a guide by the Government of Central Sulawesi in order to achieve the strategic objectives of the organization.

Keywords: Strategic Planning, Information Systems, Information Technology, TOGAF ADM, Enterprise Architecture, Business Process.
