This research is motivated by the importance of the pulpit of the church as a place for Christians to listen to the Word of God and give praise worship. The servant of the church pulpit have different configurations according to the procedure of worship. This study wants to review how the pulpit configuration in accordance with the procedures of contemporary worship pulpit servant in the Holy Word Christian Church of Taman Kalam Kopo Taman Indah Bandung. Movement patterns maid pulpit greatly contribute to the pulpit configuration.

The method used is a method of qualitative methods Think-Aloud Protocol Analysis. In this method, every servant asked to do their scenes of repeated practice of worship in the pulpit with a mention of the process and their feelings verbally. The results indicate the existence of facts and expectations from the pulpit a different waiter. Facts and expected pattern of movement waiter pulpit analyzed by theory and theory form a grid intersection zone produce mapping area indicates the area used and unused areas. Unused area can be a solution to the problem of accessibility changes position the ladder in the middle of the pulpit experienced by the waiter pulpit.

Based on the analysis of movement patterns maid pulpit with grid shape theory, the pulpit appropriate configuration should be reviewed from the pulpit own movement patterns. Through this research, the church can review how the configuration according to what is experienced waiter pulpit ordinances of worship to movement pattern of every waiter pulpit.
