

ACKNOWLEDGEMENT

Firstly, I would like to thank and show my gratitude to my supervisor, Dr. Heroe Wijanto and co-supervisor, Dr. Fiky Y. Suratman, whose guidance, support at the hour of dire need and sometimes stressful days, and encouragement has made my hard work during master studies bear fruit in form of this thesis.

Also, I would like to dedicate this thesis to all my family and friends, well-wishers, Ms Ellinor Broms, late Mr. Martin Klinge and to all those who have helped me directly or indirectly while researching and writing the thesis.
