

## **ABSTRACT**

Early childhood education is education intended for children from birth to age 6, in which there is the golden age for the child. At this time the child can reach 80% in stimulating the brain with the environment, so we need a center for early childhood development to be able to help children in optimizing brain stimulation early on and were able to develop intelligence capabilities since early childhood.

Kota Baru Parahyangan itself an integrated area in which to have a vision / mission to achieve the education-minded city. To achieve the necessary facilities memumpuni education from early childhood to adulthood. With the Early Childhood Development Center in New City Integrated Area Parahyangan is intended to reach the city of Insight Education As well as providing space against children in developing capabilities with respect to some aspects of the interior associated with children, such as freedom, security, and comfort.
