

ABSTRACT

Bandung is known as one of Education City in Indonesia. All educational aspects such as fashion, architecture, even art is available in Bandung for a deeper education. Certainly, these aspects can not be separated from the education that has been taken and also the ambience of the society. One of the aspects that supporting to create the better education is book reading. However, by the development of internet technology these days, make book reading activity become something unwilling for most of the society. This is related to educational problems because they prefer to play with gadgets to access the internet for gathering informations rather than by reading book. Whereas, book is one important tools in daily life especially for education world, because reading book helps to improve the comprehension. An incubator that provides books is library. However, most of the society these days unwilling to come and visit library, because they think that library is a boring place. This also related to the interests of reading that getting weak. But, with the availability of public library design in Bandung, hopefully the society could increase the reading interests by making comfortable and relaxing interior concepts. One of them is a concept inspired by nature, because Bandung also well-known as a tourism city with great nature sceneries in surroundings. This concept intended from the willingness to create the society that would happily spending time in the library and could exploring knowledge for more. Furthermore, an additional room that using internet in the library also applied to get along with the fundamental background that happens.

Keywords: Public Library, interests, reading, education, comfortable
