ABSTRACT

Koperasi Sejahtera Perdana is a cooperative that engaged in credit financing with ownership document of the two wheel vehicles as a guarantee. The cooperative doesn't have a good automatic billing management system, so that will impact the activity of cheating in the implementation of the billing activities. The cooperative use Microsoft Word as a tool in the making of loan repayment guarantee document for its customers, so that cooperatives often get human error, bad efficiency of time. The cooperative doesn't have the provision of credit information for its costumer. In order to facilitate cooperation in running the business process, then built a web-based application using Codeigniter Framework and MySQL database to manage the billing documents automatically, print repayment letters, and provide credit information to customers.
