Abstract

Since the mayor Bandung is held by Ridwan Kamil, Bandung residents feel many changes in the city. Tematik parks have sprung up in various locations in the city. There are 14 theme parks that have been built by Ridwan Kamil. Bandung is still comparatively few people visiting the parks. Therefore, the photo sphere is expected to attract a user to know the parks in the city of Bandung, so users are interested to visit the tematik parks in Bandung.

Tematik Park is Applications based Virtual Reality with Photo Sphere and Video to introduce parks in Bandung. There are 14 parks in the Tematik Park application. Tematik Park applications feature the Photo Sphere, Information, and Video. To make it happen is by doing a brief observation as a method of data collection and feasibility testing by the user. Tematik Park so this could be a special attraction to attract tourists to visit Bandung.

Tematik Park with applications running on the android mobile device, the user is easier to get to know the park with features that are available, so it can add interest to the user to be able to visit the tematik parks in Bandung.

Keywords: Tematik Park, photo sphere, observation, virtual reality,android mobile.
