

ABSTRACT

Rumah Potong Ayam (RPA) is the domestic industry slaughterhouse, processing chicken into chicken pieces, to fit for sale to consumers. CV RPA Kurnia Jaya is an RPA which is located in Babakan Ciamis, Bojongsoang subdistrict, Bandung regency. To enable customers to order the chicken pieces, made an application " Web Based Application For Chicken Slaughterhouse" (Case Study: CV RPA Kurnia Jaya). This app has functionality at member registration, ordering chicken, chatting, sending feedback, manage chickens data, manage orderings data, manage members data, managing employees data, managing staff's accounts, managing duties letters, manage production costs, and print earnings report. Application development process using a prototype method, with tools editor as Notepad++, PHP as the programming language, CodeIgniter as framework, and Microsoft Visio 2016 as system design. It is expected that this application can facilitate consumer ordered the chicken pieces in the CV RPA Kurnia Jaya as well as assist the company in managing data chicken and monitor income on a regular basis.
