## **Abstract**

Interest and Talent Development Center Child is a container facilities and infrastructure facilities needed to assist the child in the process of developing the potential that exists within. In accordance with the phase of development in children aged 2 to 12 years old need a container that can recognize and help children to know the interests and talents as well as meet the needs of future development. The development phase should be perfectly get by because it will affect the child's adolescence to adult later. Interest and Talent Development Centre Kids Kidspac one of which is located in Jakarta.

Bandung is a city of education and tourism for the required facilities and infrastructure that will support education and tourism. Interest and Talent Development Centre Kids can meet the needs of Bandung because it can include educational facilities which also contain elements of tourism, especially for children. Kidspac with any program there will be able to meet the needs of the infrastructure needed by the city of Bandung, especially with the form of Kidspac who were in the room so it could easily whenever it comes to playing or conducting extra unhindered by a limiting factor as the weather Bandung who have a fairly high rainfall.
