

ABSTRACT

Wyata Guna Social Homes for Visual Impaired is the only Social Homes for Visually Impaired in Bandung. Mobility, health and safety are the key points to design for visually impaired. Mobile facility for visually impaired can be reached with several ways, for example, with signage both latin alphabetical or in braille letter. Safety facility is also very important, such as smoke detector and sprinkler. Health of the visually impaired is important because enrolling in Wyata Guna Social Homes for Visually Impaired is not only helping the visually impaired to be functional to be doing daily activities, but also should be giving positive impact to their health and the environment. The supporting facility didn't fulfill the needs of the visually impaired in Wyata Guna Social Homes for Visually Impaired in sign system, room ergonomics, lighting and air system aspect. So that is the background to pick up the Redesign of Wyata Guna Social Homes for Visually Impaired that will be concentrated in mobility, safety and health of the visually impaired as the design object.

Key Words : Social Homes, Visually Impaired, Mobility
