

Abstract

Eagles Java Bird (*Spizaetus bartelsi*) is a species of eagle that is endemic to the island of Java. This animal is considered synonymous with the emblem of the Republic of Indonesia, namely Garuda Pancasila. However, in contrast to the fact that this Javan hawk included in the animals getting extinct. Due to lack of maintenance and breeding of the animal populations, causing fewer and fewer. If this condition is solved immediately, it can lead to the extinction of the figure of Garuda. And in the end we will lose the figure of a bird similar to the symbol of the Indonesian state. Pembelajaran early on the protection of animals to the children is very important. Children will be easy to understand and respond to every word and image that goes to them. Learning about protecting endangered animals through informative media that can stimulate a child's sensitivity and easy to understand what happened to the Javan Hawk-eagle. The author will make an informative media to educate young children about Eagles Java. Given this design, is expected to increase the population of Javan Hawk-eagle.
