

ABSTRACT

Mawar Fitness is a private business entity engaged in the body fitness. Mawar Fitness became one of the places that are responsible for providing the fitness. So that the processing activities of fitness is one of the core of Mawar Fitness.

Based on the existing problems in the Rose Fitness, then built the fitness processing application used for the purpose in helping the process of registration, performance trainer, payment reports, customer list reports asmembers and non-members and noted the attendance list. In addition, this application is built also expected to integrate the data used in the process with good sale.

The method used in the development of this application is the RAD method by reason of the time needed in the development of this application brief.

Tools used was Oracle Application Express (OAE), notepad ++ and balsamiq.

This processing applications to help process the processing business carried mawar fitness so that manual processes are usually done through the paper can be processed more accurately using the computer.
