

ABSTRACT

Konveksi Anwar is one of the companies engaged in the production of T-shirts. The problem with Konveksi Anwar is that there's no accounting journals and ledgers to record the transactions that occur in the company's. The sales price of the produced shirts is not adjusted to the cost of production, making the Cost of production difficult to be known precisely.

The calculation of production costs are essential for determining the main cost of production and to facilitate the calculation of production costs. The Production of T-shirts that Konveksi Anwar has has yet implemented an application that is able to determine the production cost price calculation. At the end of this project, An application to calculate production cost with Variable Costing method based on the order in Anwar convection will be made

This final project will be made using Waterfall model of software development and will be implemented using PHP programming language and MySQL database.
