

ABSTRACT

Cv Qurniyatama Ross is one a company which operates in trading market. Founded in 2006, Qurniyatama is one of distributor of The Botol Sosro. Qurniyatama making credit purchases which comes in a form of credit invoice. Sales transactions can be done in credit or cash, the proof of transaction it self is a memorandum. The company often encountered with the problem in recording, a lot of transaction records that pile up may cause loss of records and mismatch in the purchase record which later will affect to inventory records. In sales record, either cash transaction or credit transactions is recorded in the same book. This led to an unorganized book record, thus the employee need to review and double check the record in order to do a transaction. Therefore, it is required to do a computerization of record for the sake of ease of access. Stock record application with perpetual method using Hypertext Preprocessor (PHP) and MySQL Database. This application has a purpose to help a purchasing, sales, and inventory records can be accessed through stock cards, journal, ledger, and sales report. Thus, there are some functionality to achieve these objectives such as Data Master Records, Purchases Management, Sale Management, Inventory Stock Management, and Report Management.

Keywords : Purchase, Sale, Perpetual, Average, and Inventory stock.
