

## ABSTRACT

---

*PT. Citra Sukapura Megah is an official legal entity engaged in the business of property, general trading, services, transportation and repair shop. Moreover, PT Citra Sukapura Megah also engaged in the construction business / development. The weakness of this company is often recording the same transaction data so that the calculation result do not right exactly, then they need to repeat the calculation again. Furthermore, PT Citra Sukapura Megah is still using manual way in collect the maturity loans, for example calling or visiting the maturity client. It makes the billing process become inefficient. An application based on website has been made by using Object-Based Programming (PBO). Involve programming language PHP, MySQL database and use the framework CodeIgniter. This application can provide some conveniences in project management with phased payments. Further, this application can handle the project activities, as managing master data, some detailed of job, terms presentation, payment terms, realisation, invoice, payment, journals producing, and generate ledger and report of accounts receivable.*

*Keywords: PT Citra Sukapura Megah, PHP, MySQL, CodeIgniter, report of accounts receivable.*
