

## ABSTRACT

---

Hadith science is a compulsory subject in all Madrasah Aliyah anywhere. Hadith science is about understanding the science of Hadith, among others, the Sanad, Matan, Rawi. But these subjects was difficult to understand because of the presented of the content is monotonous. As for the result, the students will feel bored because there is no change in the system of teaching for these subjects. So, the students need a learning system that is easier to understand. It is expected to make students understand what the science of Hadith .

Therefore made Media Interactive Learning Science of Hadith. This learning media will be built using Macromedia Flash Professional 8 and supporting applications such as Corel Draw and Adobe Photoshop X7.

In building this learning media will be built with the Waterfall method, because by using this method will be easier to find errors that might arise during the process.

Learning Media is equipped with text, images, sounds about the Science of Hadith, is also equipped with test questions to test the ability of students to material that has been delivered.

As a result, this learning media will be very useful in the learning process Hadith Sciences .
