

ABSTRACT

Office is an important thing in company or business, including for PT. GO-JEK as an service company. PT. GO-JEK's headquarter in Jl. Kemang selatan is an object for this final project. This final project use area data collection such as, observation as a main information source and other supporting data. The issues are, PT. GO-JEK Indonesia has not facilitated the user's needs, the rooms are not well organized, and they don'r use the natural energy. Sustainable design should be applied in a big city city such as jakarta. The cozyness of an office design can improve the staff's performance. Interior design helps improving company's performance.

Keyword : Interior Design, PT. GO-JEK Indonesia, Jakarta, Sustainable Design.
