Abstract

Orangutan is the only from four taxa of big apes that live in Asia, These three other was relatives with orangutan is Gorilla, Chimpanzee, and Bonobo there live in the continent of African. Orangutan in Indonesia has two types there is Orangutan of Sumatra and Orangutan of Borneo. The longer the orangutan populations was declined continuously in last the few decades caused due to several reasons one of the reasons is a devastating the forest of lowland forest, poaching and trade of orangutan including its orangutan were smuggled out of the country. Poaching and trade of orangutan is still the main threat against the survival or the population of orangutan in Indonesia, especially the current forest fires due to the greed of man made a lot of losses not only the ecosystem of plants but also the animals such as the orangutan population.

Key Word : Illustration Book, Children Book, Population Of Orangutan, Human deeds.
