

ABSTRACT

Train Station (HALL) is a tool to smooth rail users in Bandung. Hall station is the largest station that is the city of Bandung, this station was built in the colonial period that is intended to bring the crops from Cianjur to Bandung. HALL station into alternative transportation in used citizens of Bandung, HALL station including station large station category. With the increasing number of users of railway services is the need for improvements in supporting activity in accordance with the vision station PT.KAI mission. The public facilities in the station is an important thing that must be considered. Their improvement agenda every 6 months / 1 year to be the reason for the redesign of the interior of this public facility. Thus the public facilities in Bandung railway station will be redesignated for comfort, effectiveness and user safety train services. Interior design of public facilities in Bandung railway station has a concept that "Tempoe Doeloe" means designing public facilities with styling Indies depicting the atmosphere of ancient times, namely the colonial era. The theme used is "Nostalgie" by which he meant to bring back the atmosphere of the ancient station (colonial) which is the main attraction and the icon of Bandung
