

ABSTRACT

Budget hotel is one of the emerging trends in the hospitality business, hotels of this type, including the type of hotel with minimal facilities, so this type has a low price compared to other types of hotels. Budget hotel put forward functional space there, facilities such as rooms that provide a bed with a bathroom and provide a simple breakfast for her guests.

Budget hotel be the first choice when young adults and backpacker visiting a city with intention to explore the city of Bandung, in addition to looking for a place to stay while comfortable young adults and backpacker is also looking for a cheap price and it fits perfectly with the concept of budget hotels that possess three objectives primary for the traveler that is good food, good sleep and good price.

Budget hotel more to apply the concept of minimalism in design, does not offer much facilities are not required and have a very affordable price so that the young adults and backpackers prefer to use the services of a budget hotel. In designing a lot of things that must be considered because the hotel directly related to users, some things you should consider in designing a hotel such as circulation, comfort, good aeration and lighting that supports the design of a hotel.
